Re: Pump Test at 15365 E. Rincon Creek Ranch Mon, March 27, 2023

On March 27, 2023 Ironwood Well Service LLC personnel conducted a pump test at the above location on Pima County Parcel 205-69-0270, Arizona GWR Well 55-597646.

Over the course of the 2 hour + pump test the pump in the well consistently flowed 30 Gallons per minute from a pumping depth of 140-142 feet while running at 15.6 amps. Included as an attachment is the well sounder log for the pump test with the added gpm and amperage readings that were taken manually.

All equipment associated with this well is in good working condition and installed properly.

A handwritten signature in black ink, appearing to read 'Lucas McCain', is written in a cursive style.
